GALATA CHEMICALS ANNOUNCES INCREASE IN TIN BASED PVC HEAT STABILIZERS

Friday, February 18, 2011

For immediate release

SOUTHBURY, CT – **Effective March 1st 2011**, or as contract terms allow, Galata Chemicals will increase the price of its Mark[®] tin stabilizers by up to 20% in all geographic regions. This increase is necessary to address the rapid and continuing escalation in raw material costs, not only tin metal but also other primary raw materials including, but not limited to, petrochemical derivatives and natural oil based products.

Galata Chemicals is a leading global producer of PVC additives including mixed metal heat stabilizers, tin heat stabilizers, tin intermediates, liquid phosphite esters, epoxidized soybean oil, polymer modifiers and chemical foaming agents.

Please visit Galata Chemicals web site at www.galatachemicals.com
